DESCRIPTION

Durez 32518 is an aqueous dispersion of a thermoplastic alkyl substituted phenolic novolak type resin.

TYPICAL PROPERTIES

		<u>Test Method</u>
Appearance	White Liquid	DCT 0001
Viscosity @ 25°C, cps	125.00	DCT 0061
Active NV Solids @ 105°C, %	50.00	DCT 0240
Specific Gravity	1.042 min.	DCT 0286
Particle Size, micrometers	1.40	DCT 0511

Durez test methods are available upon request.

STORAGE

Durez 32581 aqueous dispersion is slightly thixotropic and should be agitated before use. Care should be taken to keep containers tightly closed when not in use to prevent evaporation of water. Optimum storage conditions are room temperature. Do not allow material to freeze.

PACKAGING AND SHIPPING

Check with your sales representative for packaging options and availability.
