

DESCRIPTION

Durez 16382 is a finely pulverized thermosetting phenolic resin compound.

APPLICATION

Durez 16382 is formulated specifically for use as insulation coating for components such as resistors, capacitors, coils, etc.. In addition to the electrical insulation properties, this coating also serves as heat insulator, provides increased mechanical protection and minimizes detrimental effects that may result from exposure to high humidity conditions.

TYPICAL PROPERTIES

		<u>Test Method</u>
Appearance	ff White Powder	DCT 0001
Ash, %	50.50	DCT 0015A
Screen % on 100 Mesh	0.1 Max	DCT 4007A1

Durez test methods are available upon request.

STORAGE

Durez 16382 is a stable material that has little or no tendency to sinter in storage provided it is kept in closed containers in a cool, dry place. Optimum storage conditions are below 23°C and 60% relative humidity.

PACKAGING AND SHIPPING

Available in 30 gallon fiber drums, 300 pounds net. This product is not DOT regulated in drums.

READ THE MATERIAL SAFETY DATA SHEET BEFORE HANDLING,
STORING OR USING THIS PRODUCT.
